DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 6-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 6, the language as written renders the claim indefinite, because it is unclear whether the claim is dependent or independent. If the claim is independent, i.e., "a polisher brush", then the reference to "claim 1" renders it indefinite since the scope can not be ascertained, if it is a dependent claim, it fails to further limit the parent claim, i.e. claiming a product fails to further limit or define the manufacturing method, as there are no further steps to the manufacturing method.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Barber, Jr. et al. (5,518,794).

Barber, Jr. et al. disclose a brush-shaped grindstone that is manufactured using composite yarn composed of inorganic filaments impregnated and hardened with a

resin, where the yarn is formed into rod assemblies that are embedded in holes of a hub and held therein by an adhesive (Col. 25, lines 15-23).

Conclusion

5. Normally a claim, or claims, which fails to comply with the first and/or second paragraph of 35 USC 112, will not be analyzed as to whether it is patentable over the prior art since to do so would of necessity require speculation with regard to the metes and bounds of the claimed subject matter, see the rejection under 35 USC § 112 above.
6. The remaining prior art made of record but not relied upon, at this time, is considered pertinent to applicant's disclosure.
